

## The Usable Archive

Arkivum 6 is the modular, flexible end-to-end solution for long-term data safeguarding

Data volumes continue to increase, compliance and governance standards grow ever more stringent and punitive.

Arkivum 6 provides the end-to-end managed solution you need to archive data in a secure and accessible manner for the long term.

### Archiving Made Simple

Arkivum is a trusted partner for institutions across multiple industries, safeguarding petabytes of archived data with a 100% guarantee of data fidelity. The solution gives you peace of mind and enables you to simplify your data management plans for the long term. Arkivum 6 is designed to adapt to your requirements as your needs evolve, to optimise the future value of your digital records.

Arkivum 6 makes it easier for you to choose the solution which suits you best, with the knowledge that at any point in the future you can build in more resilience, scalability, data sovereignty, and integrations with an unlimited number of data sources.

Arkivum 6 can be deployed via a modular approach to solution design, from data ingest through geolocation, system resilience and managed service models.

### Sovereignty, Control and an Exit Plan

Arkivum will provide transparency and control over the sovereignty of your data and also provide the exit strategy you need to make sure your data remains under your control.

This is essential as part of a robust recovery policy yet often these basic rights are not embedded into other systems.

**Arkivum believes that your data is yours, and yours alone.**

With Arkivum 6, your exit route is built in, giving you peace of mind and total ownership of the destiny of your data.

**Unlike others, we will never hold your data hostage through proprietary formatting or excessive data egress charges, and we make it easy to migrate your data to other suppliers.**

### ISO 27001

Arkivum is ISO 27001 certified, meaning that you can benefit from our adherence to the highest quality standards and processes.

## Compliance & Governance

Compliance with regulatory requirements and internal best practices concerning archived data is a challenge facing many industries, from Financial and Legal Services, Life Sciences, Healthcare to Galleries, Libraries, Museums and Education. IT departments can now respond to these needs with a platform-agnostic, scalable and predictable end-to-end archiving solution: Arkivum 6.

**Arkivum 6 is designed to grow with your changing needs making data accessible and usable to those for whom compliance with recordkeeping standards is emerging as the major long-term technical challenge.**

Arkivum 6 has the flexibility for solutions to be engineered according to requirements ranging from HIPAA compliance, retention rules around MiFID II, GDPR complexities such as data portability, datacentre locations, connectivity to data sources and more.

## The Usable Archive

## End-to-End Managed Service

**Arkivum 6 makes sense for your long-term technology strategy:**

- Backups, technology refreshes and migrations are key events
- Data growth means they can become unmanageable over time
- Cost growth and unpredictability, management time
- Inherently risky events e.g. data migrations
- Compliance with internal and external standards is a challenge
- Distracts from day-to-day operations

## About Arkivum

Arkivum provides specialised best-of-breed long-term data safeguarding and archiving solutions, designed to respond to today's compliance and governance requirements. Arkivum works with institutions across multiple verticals, all of which generate high amounts of mission-critical data that needs to be preserved for many years to come.
